

Dear DLI Families,

For the rest of the month we will begin talking about means of transportation and rules. As part of our ECLIP curriculum, I am asking that as a family, you work with your child to build a car out of cardboard. It can be decorated however you want (must be school appropriate). Once it is turned in we will have a car show, where our students can display their cars. We will also have a part of the show where we will have traffic signs that they must follow. The intention of this project is to show our students that there's rules everywhere that they must follow.

Some of the requirements:

- Car must be made out of cardboard
 - Car must have straps so that student can display it
 - Students will wear the car; please make sure that it is not TOO big
 - BE CREATIVE
 - PLEASE DO NOT STRESS, this is a learning experience for your family and students.
- The Finished car should be turned in on ***Monday December 2nd, 2024.***

JOIN US December 6th, 2024 at 2:30 p.m. for Our Car show. Please go directly to the Parish Center Gym, NOT the school office.
